

**Paper Towel Filter**

**Use 2 sheets of paper towel and stuff into cup to make a simple filter**

**Paper Towel Filter**

**Tuck paper towel into cup to make a concave filter**

**Paper Towel Filter**

**Once in place slowly pour the soil/water slurry into the filter**

**Let water sit in filter and drip through into cup below (can take a few minutes)**

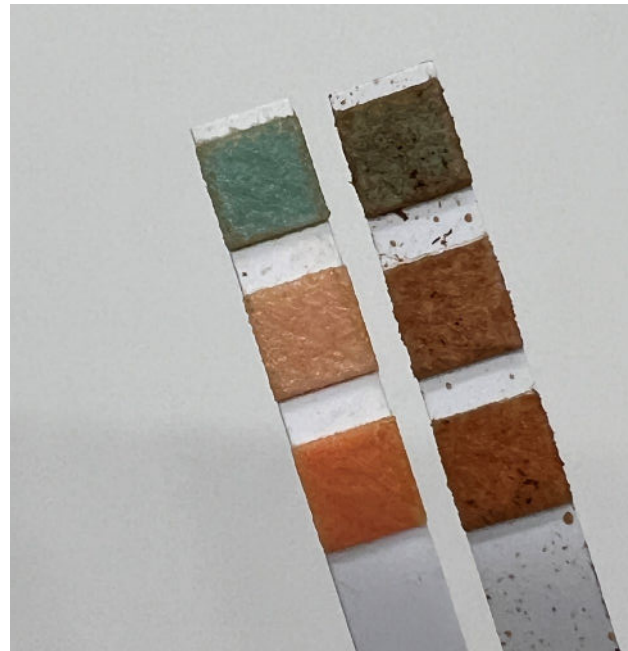

**If needed, gently remove the filter and squeeze to slowly to release some of the filtered solution**

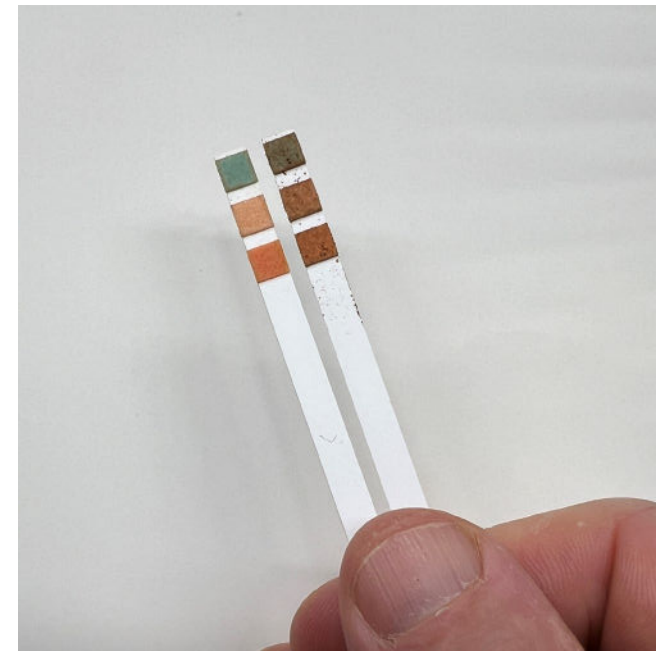

**Dip test strip into the filtered solution**

**Filtered solution test**

**Filtered soil/water solution test (left)  
Unfiltered soil/water solution (right)**

**Filtered soil/water solution test (left)  
Unfiltered soil/water solution (right)**
